

## 5512 Frontier Detergent

### Products/Procedures

**Fabritec 5512 FRONTIER DETERGENT** is a substantive detergent system that eliminates the need to test the system for detergent concentration as the detergent added is removed from the system by the fabrics treated. Unlike charge systems of cleaning, there is little loss of detergent by distillation. Therefore, the cleaning system can be kept almost pure by increasing the amount to be distilled with no penalty of detergent loss.

Small additions of water can also be added to each load to provide maximum safety in water-soluble soil removal.

5512 FRONTIER DETERGENT cleaning provides maximum whiteness retention repels soil and prevents it from redepositing back onto the fibers. Excellent anti-static properties prevent linting.

5512 FRONTIER DETERGENT is added to each load at the rate of 2 oz. for each 10 lbs. cleaned. Moisture may be added up to 1 1/2 oz. per 10 lbs. cleaned. Additions may be made manually or by means of an automatic dispenser. If water is added, the drycleaning unit must be operated off filter (batch or mill) for 3 minutes prior to cleaning on filter.

5512 FRONTIER DETERGENT contains a fresh mountain spring fragrance to impart a pleasant scent to the cleaned articles.

Note: Safety Data Sheet (SDS) available on request. Call 1-800-543-0406.

The logo for Fabritec Brand Detergent features the word "Fabritec" in a large, stylized, light blue font with a white outline and a registered trademark symbol (®) to the right. Below it, the words "Brand Detergent" are written in a smaller, light blue, sans-serif font. The entire logo is set against a light blue, oval-shaped background.
