

Fabritec 5921 Prestige Enzyme Detergent

Products/Procedures

Fabritec 5921 Prestige Enzyme Detergent for Shirts and Regular Washables is a fully formulated, low pH, one shot liquid detergent that may be used in any water temperature. Fabritec 5921 Prestige Enzyme Detergent contains a blend of enzymes that aids in the removal of common stains. The detergent also contains a surfactant blend that effectively removes all types of tough ground-in soils. Fabritec 5921 Prestige Enzyme Laundry Detergent can be used with degreasing agents such as **Stamford 6743 L.P.S.** Prespotter and color safe bleaches such as Sodium Perborate or Sodium Percarbonate. Fabritec 5921 Prestige Enzyme Detergent contains a low phosphate level, less than 1% as phosphorus.

Fabritec 5921 Prestige Enzyme Detergent can be used to clean all garments and items that can be processed in a built (alkaline) detergent.

USE INSTRUCTIONS:

Home Washer: Add 1-2 oz. at low level and 2-4 oz. at high level. Use a cold, warm, or hot water wash depending on load type and soiling level. Rinse articles well as **Prestige** contains enzymes.

Commercial Washer: Add 4-10 oz. per 50 lb. of garments/articles depending on soiling level. Use cold, warm or hot wash cycles depending on load classification.

For the shirt laundry: See the attached recommended instructions for maximum cleaning results. In all cases follow garment care instructions.

Note: Safety Data Sheet (SDS) available on request. Call 1-800-543-0406.
